CMS Status	Compliant Nights (≥4h)	Mean Usage	Mean AHI	Mean Leak	Mean Snoring	Weight-AHI Corr (r
COMPLIANT	13/14 (92.9%)	6.6 hrs	4.0 /hr	7.9 L/m	3.9 /10	0.779

3. Recent Nightly Therapy & Snoring Log (Last 10 Sessions)

Date	Usage (h)	AHI (/hr)	Leak (L/m)	Snore (0-10)	Snore (min)	Position	Weight (kg)
2026-10-18	7.5	2.0	3.8	1	10.0	Side	89.5
2026-10-17	6.5	3.8	8.5	3	16	Mixed	90.5
2026-10-16	7.3	2.4	4.1	2	10	Side	90.7
2026-10-15	7.8	2.1	3.9	2	9	Side	90.9
2026-10-14	7.5	2.5	4.3	2	11	Side	91.2
2026-10-13	6.2	4.5	9.4	5	27	Mixed	91.5
2026-10-12	7.4	2.9	4.8	3	14	Side	91.4
2026-10-11	6.9	3.4	5.9	3	18	Side	91.6
2026-10-10	7.1	3.6	6.2	4	20	Side	91.8
2026-10-09	6.7	4.1	7.8	4	24	Side	92.0

4. Weekly AI Clinical & Lifestyle Insights

- **Improved:** Mean AHI improved from 5.1 to 2.89 events/hr (2.2 fewer events/hr).
- **Improved:** CPAP nightly usage increased from 5.99h to 7.17h per night.
- **Improved:** Snoring severity score dropped from 5.29/10 to 2.57/10.
- **Improved:** Mask seal remained tight with low average leak (5.54 L/min).
- **Improved:** Maintained a 18-day smoke-free streak, reducing upper-airway mucosal edema.
- **Watch Area:** No major regressions this week — stellar consistency!
- **Recommended Next Step:** Practice 5 minutes of Oropharyngeal Tongue-Slide exercises + Side-Sleeping positional alignment tonight, and avoid alcohol within 4 hours of bedtime to keep AHI under 2.5.
